

Mental Math SAMPLER - Installation Guide

1. Double Click on the attached file to unzip it.
2. Double Click on the Setup.exe file to install it.
3. The Welcome! screen will pop up. Click Next.
4. Click Next to accept the directory shown for installation or type in your choice.
5. Click Next or Enter, progressing through the screens until finished with the installation.
6. The program should be visible to start from your desktop or "Programs" list. If not, go to Program Files on your "C" drive, and look for the Mentor file.
7. Double-click to show the file list and then double-click again on the Mentor file.
8. The entry screen will appear and easy-to-follow operating instructions are given.

The system that really makes (Number) Sense!

Mental Math Mentor software with Notes includes a computer program that operates in a self-paced tutorial format. By doing calculations in their heads and learning valuable short-cuts, students are prepared for success in the Number Sense contest. The exercises and examples are presented clearly and logically, and were selected by Don Skow, long-time director of the contest. Some 70 shortcuts are presented with problems generated for each to test your students thoroughly.

Mental Math Mentor	\$130
1-year extended usage license (for installing on up to 5 students' computers).....	add \$90
