## The 'Word' in Computer Apps

Hexco is pleased to unveil *Concepts - Word*, our newest publication for the UIL Computer Application contest -- a valuable addition to your resource library. Geared for intermediate to advanced level students who are ready to master the less obvious concepts as well as many of the less-obvious features and facilities, this new publication is also useful for increasing speed on skills most "think they know." *Concepts - Word* also introduces practice problems that are commonly seen on official Computer Applications tests at various levels. The student who knows exactly where to locate obscure commands and can manipulate them quickly and efficiently tends to have a significant advantage in the contest. More than a refresher book, *Concepts - Word* is practical for learning integration with Excel and Access and details specific tasks that are often utilized in UIL contests.

## Computer Workshop Videos

Save time teaching and give your students a real chance to learn some of the most difficult UIL Access and Excel exercises **with video!** Each 15-20 minute lesson incorporates the latest screen-capture technology and the expertise of Huntley Tarrant, EVP of *Mind-bites, Inc.* and the daughter of Hexco President, Linda Tarrant. Available topics: Create Query, Append Query, Use a Delete Query, Update Query, etc. There will also be a series on reports, modifying reports, and much more! Videos may be purchased as a one-year online subscription; prices discounted for "sets." Many more screen-capture Computer Apps videos are underway, so please check our website for updates or call before you order! (Brochure includes some pricing.)

## Turbo-Charge your Budget with Wish Lists!

Thinking 'outside the box,' has budget solutions 'in the bag'. Before you get discouraged, remember that cuts in funding do not necessarily have to compromise education. Both parents and businesses can be a powerful tool in absorbing costs for UIL expenses. If you are feeling the crunch, it is still possible to get all the tools you need for a winning performance and remarkable results. We strongly suggest compiling a UIL "wish list" and sharing your list with anyone who might like to make some of these purchases for you.

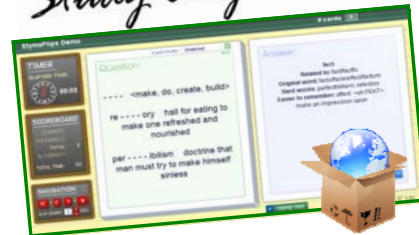

Our new website has a "Wish List" option that you can create, add products, and share with others through your online Hexco account. You can create one wish list, or several,

and send the corresponding links to parents or prospective team sponsors through your email.

Throughout the years, many UIL parents have mentioned that they did not know that a company like ours existed, and many are willing to purchase additional supplies if it could increase their child's chances of success. Businesses are often willing to pay for study materials and can use some of their advertising money on sponsoring a local UIL team. A sponsoring business might even arrange to get a few tee-shirts made with their logo and the name of your UIL Team. Try area banks, orthodontists, attorneys, doctors, etc. Local media also tend to favor such generosity by including group photos of students and their sponsors in the local newspaper - especially when they return with a mass of awards!

Virtually Study Anywhere!

"Flips" virtual flash cards are our new dynamic study method that makes home study more accessible and facilitates interaction in a group setting. A one-year subscription requires online access; Mac or PC compatible. **TRY FREE Demos!** on our "Flips!" page online.

**1951 UIL District Typing Champion Annie Peschel Mosty** - "I won the school typing contest and they asked me to go to this competition in San Marcos," said Ms. Mosty who did not even know the competition existed at the time. Ms. Mosty is the grandmother to Hexco's Noel Eddy, also pictured above.

## READY WRITING

### Ready Writing Concepts

#### Develop Your Individual Writing Skills

Ready Writing challenges contestants in ways other competitions do not. While most others include predetermined topics, extensive materials, reading lists, or study guides, Ready Writing requires contestants to utilize a toolbox contained entirely in their minds. In addition, the contents of this toolbox are unique compared to those one would pack for a standard essay-writing scenario. **Ready Writing Concepts** explores expository writing with students, instructing them in the art and skill of constructing strong essays. Sections address thesis support, tone, voice, style, word choice, and structure, pitfalls to avoid, as well as samples of strong and weak essays, plus practice exercises.

### Spelling Rules Book

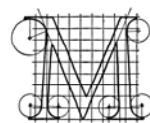

Rely Less on Memorization!

**Spelling Rules Book** is entitled "*Why Isn't 'Phonetic' Spelled the Way it Sounds?*" This is a *sine qua non* for competitive spellers. Our 150-page compilation expounds on spelling rules and conventions to promote less reliance on rote memorization and more on understanding language. Students learn when to use *-ible* rather than *-able*, for example, and they will never look at the *i-before-e* rule the same way again! This book explains rules for spelling words from foreign languages which are included in our dictionaries. An encyclopedic list of Greek and Latin roots with definitions and words derived from each is included.

### UIL Spelling Mentor Software

Master the Entire "Word Power" List

**UIL Spelling Mentor** software helps ALL your spellers learn ALL the words in the UIL study list! Not designed just to test students, **Mentor** is an interactive tool to keep students engaged in mastering the entire *Word Power* list. Words are presented in difficulty sequence matching the difficulty sequenced **Complements**. **Mentor** works with students in an encouraging manner as a proficient coach would. Students hear the word spoken as the screen displays the phonetic pronunciation(s), definition(s), part(s) of speech, and sentence. Progress is tracked for up to 20 students, which allows individuals to narrow their study as they master words. Software may be installed on multiple computers at one location. Features include the ability to preview words, request next letter, and flag problematic words. Vocabulary words may be isolated to study separately, and all have etymology. A one-year extended-usage license for installing on up to five students' home or personal computers is also available.

Once your wish list(s) is/are set up, every time you click on a product, a red oval button called "Add to my Wish List" will appear in the left-hand green column, usually below the Twitter feed. The Wish List area will display all the lists that you have created. Choose the appropriate category.

When you have finished shopping and saving to your wish list(s), you may view, edit or share any list by again clicking on "Wish List" in the horizontal bar. When you select "Share" under the "Action" list, a link will appear that you can *copy and paste into an email and send to whomever you like*.

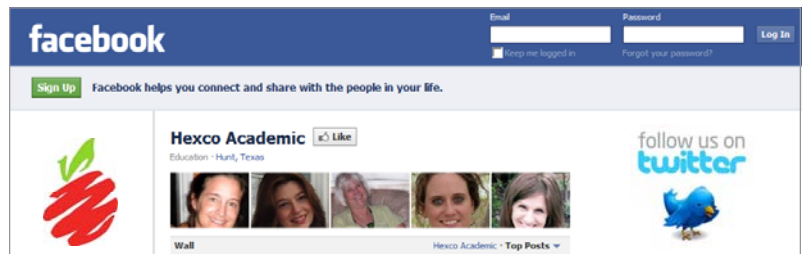

If you prefer print instead of email correspondence, you may print any lists that you create and give them to parents or potential sponsors. To further assist you, Hexco will provide supplemental downloadable "ask" forms that are appropriate to give parents or business sponsors. These forms will be available on our "Downloads & Brochures" link on our website at the beginning of the 2011-2012 school year.

### How to Create Your Own Wish List:

- Login to your Hexco Account (set one up if you have not already)
- Click to "Wish Lists" on the horizontal bar
- Go to "Create A New Wish List"
- Name the List (i.e., "Parents - Ready Writing," or "Business Sponsor," etc.)
- Click "I want to be able to share this wish list"
- Save
- Add and Save any other categories
